Successful Appearance at IFAT Munich 2026: Valuable Insights and In-Depth Discussions

Munich, Germany – The Bauer Umwelt division of BAUER Resources GmbH looks back on four inspiring days at IFAT Munich, which made its exhibition presence at the “Bayern Innovativ” joint booth a resounding success.

IFAT Munich serves as a platform, networking event, and knowledge hub all in one. It brings together the most important international industry representatives from politics, business, and science. In 2026, approximately 3,000 exhibitors from more than 60 countries participated. As the largest fair for environmental technologies in the fields of water, recycling, and circularity, it offers exciting ideas and innovative solutions for industrial and municipal challenges.

From May 4 to 7, the Bauer team presented, among other things, brownfield remediation and geothermal projects, advanced in-situ remediation processes for on-site treatment, and customized concepts for soil and groundwater treatment as practical and resource-efficient solutions for sustainable environmental technology. And interest among trade visitors was high. The numerous in-depth discussions with experts from around the world were particularly valuable.

“The positive feedback on our development-oriented approaches demonstrates just how important resource-efficient remediation concepts and sustainable processes are today. The trade show has once again proven that we can achieve a great deal together – for an environment that we want to shape responsibly. We are going home with numerous new ideas and look forward to upcoming projects and partnerships. Many thanks to everyone who visited us!” said Dr. Johannes Köhler, Head of the Technical Department at Bauer Resources.

About BAUER Resources Group

The regionally organized BAUER Resources GmbH is aligned to projects around the world with its subsidiaries in Germany, Africa, the Middle East and South America and has extensive expertise in the areas of drilling services and water wells, environmental services, constructed wetlands, mining and rehabilitation. With more than 30 years of experience, BAUER Resources GmbH's Bauer Umwelt business division is one of the leading specialists in site remediation, soil remediation and waste disposal, both in the domestic market and internationally. As an expert in pollution reduction, Bauer Umwelt offers a diverse range of services for all environmental issues. Other companies of the BAUER Resources Group are GWE GmbH, SCHACHTBAU NORDHAUSEN GmbH and SPESA Spezialbau und Sanierung GmbH. More at <https://resources.bauer.de/en>.

About Bauer

The BAUER Group is a leading provider of services, equipment and products dealing with ground and groundwater. The Group can rely on a worldwide network on all continents. The Group's operations are divided into three forward-looking segments: Geotechnical Solutions, Equipment and Resources. Bauer profits enormously from the collaboration of its three business segments, enabling the Group to position itself as an innovative, highly specialized provider of products and services for demanding projects in specialist foundation engineering and related markets. Bauer therefore offers suitable solutions to the world's greatest challenges, such as urbanization, the growing infrastructure needs, the environment, as well as water. The BAUER Group was founded in 1790 and is based in Schrobenhausen, Bavaria. In 2024, it employed about 11,000 people and achieved total Group revenues of EUR 2.2 billion worldwide.
